POPULATION OF ELECTORAL DISTRICTS

Final population totals from the 1956 Census, with comparative totals of the 1951 Census, are presented in this report for the 263 federal electoral districts in Canada by provinces, based on the Representation Act of 1952.

Details of the population distribution within each electoral district by counties, municipalities, townships, cities, towns, villages, unorganized areas, etc., will be issued at a later date as part of the regular series of final reports to be issued from the 1956 Census. (See Report No. 1-1.) The purpose of this compilation is to make available summary totals by electoral districts at the earliest possible date.

POPULATION DES DISTRICTS ÉLECTORAUX

Le présent rapport contient, avec chiffres comparatifs du recensement de 1951, le chiffre définitif de la population relevée lors du recensement de 1956 dans les 263 districts électoraux du Canada, par province, basés sur la loi de 1952 sur la députation.

Les détails relatifs à la répartition de la population de chaque district électoral par comté, municipalité, township ou canton, cité, ville, village, région non organisée, etc., seront publiés plus tard et feront partie de la série régulière des rapports définitifs qui doivent être publiés sur le recensement de 1956. (Voir rapport n° 1-1.) L'objet du présent bulletin est de faire connaître les chiffres sommaires par district électoral le plus tôt possible.

POPULATION OF COUNTIES AND CENSUS DIVISIONS

Final population totals from the 1956 Census are presented in this report for the 234 counties (including territorial districts) and census divisions in Canada by provinces. Comparative totals are given for the Census of 1951.

Details of the population distribution within each county or census division by municipalities, townships, cities, towns, villages, unorganized areas, etc., will be issued at a later date as part of the regular series of final reports to be issued from the 1956 Census. (See Reports Nos. 1-2 to 1-5 inclusive.) The purpose of this compilation is to make available summary tables by counties and census divisions at the earliest possible date.

POPULATION DES COMTÉS ET DES DIVISIONS DE RECENSEMENT

Le présent rapport contient le chiffre définitif de la population relevée lors du recensement de 1956 dans les 234 comtés (y compris les districts territoriaux) et divisions de recensement du Canada, par province. Il donne aussi les chiffres comparatifs du recensement de 1951.

Les détails relatifs à la répartition de la population de chaque comté ou division de recensement, par municipalité, township ou canton, cité, ville, village, région non organisée, etc., seront publiés plus tard et feront partie de la série régulière des rapports définitifs qui doivent être publiés sur le recensement de 1956. (Voir rapports 1-2 à 1-5 inclus.) L'objet du présent bulletin est de faire connaître les chiffres sommaires par comté et division de recensement le plus tôt possible.

NUMBER AND AREA OF FARMS

The number and area of farms in Canada, as recorded in the 1956 Census, are presented in this report. For comparative purposes, the 1951 figures are included where available.

<u>Definition of a Farm</u>: For census purposes a farm is defined as a holding on which agricultural operations are carried out and which is:

- (1) three acres or more in size, or
- (2) from one to three acres in size, and with the agricultural production in 1955 valued at \$250 or more.

The holding may consist of a single tract of land or of a number of separate tracts held under the same or different tenures, and operated as a single unit. The same definition was used in the 1951 Census. For comparison with earlier censuses, in which different criteria were used, see the Introduction to Volume VI. 1951 Census.

The area of farm land reported for each municipality or subdivision represents the area of land operated by farmers whose headquarters are in the municipality. The area of farm land reported in the tables for the municipal units may, therefore, be greater or less than the actual farm area within the municipal boundaries. For larger subdivisions of the provinces, such as census divisions or counties, the discrepancy between reported area of farms and actual farm area within the subdivision will be less significant.

In certain sections of the Province of Quebec, the land measure is the arpent and enumerators reported land area in this unit. The conversion to acres was made in the Bureau of Statistics, using the factor 1,000 arpents equal 845 acres.

NOMBRE ET SUPERFICIE DES FERMES

Le présent rapport donne le nombre et la superficie des fermes au Canada d'après le recensement de 1956. Pour fins de comparaison, on y a ajouté les chiffres de 1951 quand ils étaient disponibles.

<u>Définition d'une ferme</u>: Pour les besoins du recensement, une ferme est un lopin de terre consacré à l'exploitation agricole et:

- ayant une superficie de trois acres ou
- 2 ayant une superficie de une à trois acres et dont la production agricole en 1955 a donné \$250 ou plus.

La terre peut se composer d'un seul ou de plusieurs lopins distincts détenus selon le même mode d'occupation ou selon des modes différents mais exploités comme une ferme unique. La même définition a servi lors du recensement de 1951. Si on veut la comparer à celles des recensements antérieurs, qui se basaient sur des critères différents, voir l'Introduction du volume VI. Recensement de 1951.

La superficie de la terre agricole déclarée pour chaque municipalité ou subdivision représente la superficie de la terre exploitée par les cultivateurs dont le lopin de terre principal est situé dans la municipalité. La superficie de la terre agricole indiquée dans les tableaux pour les unités municipales peut donc être plus ou moins étendue que la superficie réelle de la ferme située en deçà des limites municipales. Dans le cas des grandes subdivisions des provinces comme, par exemple, les divisions de recensement ou les comtés, la discordance entre la superficie déclarée et la superficie réelle des fermes dans la subdivision sera moins marquée.

Dans certaines parties de la province de Québec, la mesure agraire est l'arpent et les agents recenseurs ont consigné la superficie de la terre en arpents. La conversion en acres a été faite au Bureau de la statistique, qui a employé le facteur de 1,000 arpents pour 845 acres. There has been a complete reorganization of the municipal boundaries in the Province of Alberta since the 1951 Census. It has not been possible, however, to tabulate the number and area of farms reported in the 1951 Census according to the new municipal units or subdivisions. Major changes were made also in the census division boundaries at the same time but estimates of the 1951 number and area of farms in the new divisions have been made and are shown in the table.

La province d'Alberta a complètement réorganisé les limites de ses municipalités depuis
le recensement de 1951. Il n'a pas été possible
jusqu'ici, toutefois, de mettre en tableaux,
d'après les nouvelles unités municipales ou subdivisions, le numbre et la superficie des fermes
déclarées lors du recensement de 1951. Des changements importants sont survenus en même temps
dans les limites des divisions de recensement,
mais les estimations pour 1951 du nombre et de
la superficie des fermes dans les nouvelles
divisions sont complétées et figurent au tableau.

Symbols used in this report:

- (-) means "nil".
- (..) means "not available".

Signes conventionnels utilisés dans ce rapport:

- (-) signifie "néant".
- (..) signifie "non disponible".
